

Biology Bonanza

Bugs, Birds & Beasts- The things with feet have similarities that are neat!

Act out and analyze animal adaptation, mimic model mimicry, and catch their complex conversations. Dissect an Owl Pellet and have a bone to pick with what you find inside!

Cell City - Ribosomes, lysosomes and 'some more!

Get to the *nucleus* of the matter and see how small systems echo into the bigger picture. Build your own Cell Model using a slimy simulation of cytoplasmic science!

Organ Trail - Stow that covered wagon and get the insider scoop on your insides! Discover what your organs do for you and paint a Personal Panorama of your proportional persona.

[Make] No Bones About It - The neck bone's connected to the elbow; the elbow's connected to the shin bone, the shin bone's... wait, that's not right!. Piece together *ostensible* skeletons from osteometric clues and put your foot down with the Case Stamper kit.

***Green with Ivy** - The greening scening has quite the meaning!

Get to the root of plant sciences and explore the function of colors found in nature. Pick pigments and express your creativity with natural dyes to make your own work of art!

*Kit not used with 4-day programs.
