

CRAZY CHEMWORKS

Lab Works

Learn the language of the lab with this hands-on introduction to laboratory equipment. *Measure-up* to the Graduated Gear take-home.

pH Phactor

Activate awesome actions using acids & bases. Ride the rainbow of the pH scale. *Mix-up* some fun at home with a Reaction Tube.

Slime Time

Follow a fantastic formula for forming fun reactions and prepare some precipitate polymers. *Shake-up* your own lab with slime!

Chem in a Flash

Compose compounds and conduct catalysts to speed up, slow down, or reverse chemical reactions. *Swirl-up* some science with the Action Flask added to your collection.

Super Sticky Stuff

Sample the science on what hold stuff together. Find out why some things are sticky and why other things are just stuck. *Stir-up* some fun with your own Professor Beakerdude.

Dry Ice Capades

Investigate icy interactions and phase transitions for forming solid, liquid and gaseous states of matter. *Heat-up* the experiments with the Thermo-color cup.

Each Class will have a Mad Science Project for the participants to take home.
